Subject: FW: From TX Dept of Ag: Salinity test kits or instrumentation request

Please include this statement in the afternoon bullets:

EPA received a request from Texas Department of Agriculture on behalf of State Operations Center and THAC for salinity probes. They need these to assist ranchers in Hurricane impact zone for determining if livestock drinking water resources are safe for use Texas A&M and the TAHC need field testing of waters to make sure they are safe for livestock because of Hurricane Harvey. NRCS has 10 to 12 devices that measure the electrical conductivity of water, which is an indicator for salinity/salt.
